<http://www.phonesystems.net>

**Prices :**

*Cell Wireless Green Tariffs*, from French residential phone toward Ecuador residential phone: **0,199** euro one minute + monthly subscription of **3,16** euros corresponding to a Web site hiring.

*Free*, from France Wifi/VoIP towards Ecuador residential phone: **0,19** euro minutes

*Cell Wireless, Green Tariffs*, from France Wifi/VoIP towards Ecuador Residential phone: **0,166** euros minutes + monthly subscription of **3,16** euros corresponding to a Web site hiring.

*Skype Wifi Phone* from France Wifi/VoIP towards Ecuador Residential phone: **0,137** euro minute.

*Netappel* , from France Wifi/VoIP towards Ecuador residential phone: **0,08** euro minute.

**To telephone free via Wifi on the residential phones in 68 countries even also for certain countries on the mobiles:**

[http://www.lowratevoip.com/en/splash\\_skype.html](http://www.lowratevoip.com/en/splash_skype.html)

(Require 10 euros of credit, usable on the paying destinations and a maximum 200 minutes per week on the not taxed destinations.)

**You do not have a Wifi phone:**

But wish to telephone the international one starting from your GSM without ruin.

It is possible, thanks to with *Voxlib* plug-in for *Skype* :

<http://www.voxlib.com>

**Prices :**

*Cell Wireless Tariffs Green* via *GSM Bouygues*, from France towards Argentina Residential phone = **0.25** euro minute + cost of the kilo byte *data gprs*. (Except subscription cost with *Cell Wireless* Web site hiring of **3,16** euros per month and provided that you are able to make it walk!)

*Voxlib* via *GSM Bouygues* + *SkypeOut*, from France towards Argentina Residential phone = **0,18** euro minute. (Starting from a *Bouygues* Reference fixed price and except cost of subscription to *SkypeIn* of **2,5** euros per month)

*Voxlib* also allows to make conferences with several, to transfer its calls via *SkypeIn* or to send *SMS*.

There still *Cell Wireless* is theoretically much more expensive on the cost per minute and the subscription, because the service on *GSM* do not function in France and to compare it with a service which goes no direction has. It is initially a swindle.

### **You do not have a Wifi phone nor an ADSL connection available to the call transfers:**

But wish to telephone the international one starting from your GSM without ruin.

It is possible, thanks to *Vonroz* :

[www.vonroz.com](http://www.vonroz.com)

### **You have one SmartPhone or Pocket PC who accepts the SD card?**

It can receive a *Wifi SD Card*. Check compatibility.

***Cell Wireless* sell a basic, black and white screen phone, without Web navigator, telecommunication credit or router for 330 USD, but competition proposes better, cheaper:**

### **A joint offer of Skype ,SMC and Fon**

*Skype*, *SMC* and *FON* joined to propose an offer of telephony *IP* supplements which allows the users *Skype* to telephone free without having to light a computer. Exclusively marketed on line on the *Skype Web site*, this new package suggested at the cost of 139 € in Europe and 159,99 dollars in the United States contain a telephone *Wifi Skype* or *Skype Phone*, a router *WiFi* and a 500 minute old batch *SkypeOut*.

Product by *SMC* the telephone *Skype WiFi WSKP100* the software of telephony contains on *IP Skype* and allows to pass from the phone calls without the assistance of a computer, since does not import which network *WiFi* opened, such that of *FON* who within the framework of this offer provides the router without wire *Fonera*. While agreeing to share part of its bandwidth Internet by the means of this router *WiFi*, the user becomes a member of the community *FON* and can thus reach the access point free *FON*. *FON* assert a community of several thousands of users, which does as many access *WiFi* points on a world level. Calls towards the other users of *Skype* are free, and *Skype* who is on the initiative of this bundle offers 500 minutes *SkypeOut* to call the traditional numbers in the whole world, like one year

of subscription to the voice messaging *Skype*. On the other hand to receive calls passed on a telephone line on the telephone *WiFi Skype*, it is necessary to acquire the option *SkypeIn*.

<http://en.fon.com/skypefon/>

At the beginning of 2007, Skype must launch to the United States and Canada a formula by annual subscription, whose price is without equivalent on the market of telecommunications: for 30 dollars, the user will be able to pass from the unlimited calls towards fixed and mobile ones on all North America.

### **The French operators propose their *Wifi* and *GSM/Wifi* phones from 1 euros and up to forty-eight unlimited destinations:**

***Cell Wireless* services and competes with it:**

*Cell Wireless* associates criticize the competitor Telco, reproaching them for making sponsorship handing-over without possible comparison with their rewards plan.

However this one is just a scam promise. The competitor Telco offer smartphones until three hundred euros height to their customer, this is not a promise but a fact.

When a mobile operator cannot ensure the service during half an hour, that makes a scandal which it refunds and compensates.

*Cell Wireless* is not worried to refund and compensate anyone for a service which never functioned.

*Cell Wireless* rob the credit of its customers sending *SMS*, then but it is possible to send free *SMS* from your *GSM* compatible:

<http://www.crickee.com/send-sms-free.php>

To send *SMS* everywhere in the world starting from 0,05 euros:

<http://www.lowratevoip.com>

### **Free e-mail on GSM:**

*Bouygues Telecom* Telco allows free emails send it and reception, into its *i-mode* owner software. A solution which, to circumvent it *SMS*, will make surely viral replication.

### **No voice messaging with *Cell Wireless* :**

At *Skype*, the *SkypeIn* option activate a free voice messaging.

At *Cell Wireless* there is no voice messaging of the whole.

### **The call transfer:**

You are abroad but you have a *Freebox* in France. With the call transfer to the tariff in force, let the others call to you free where that you are, that is to say forty-eight destinations throughout the world. (Free calls enters *box*)

### **An alternative to *Wifi*, the *DECT/SIP* telephone:**

This type of residential telephone enables you to cumulate two *VoIP* operators on same compound. *DECT* better performance in the capacity of sound, autonomy and range has.

Example of telephone DECT/SIP:

SIEMENS Gigaset C450 IP

SIEMENS Gigaset S450 IP

SIEMENS Gigaset SL75 WLAN
